Profile

I build practical tools that turn messy work into usable software: ranked lists, PDF/DOCX reports, React dashboards, ERP-style workflows, automations, and AI-assisted development workflows with manual verification. I am looking for remote internships, freelance projects, contract work, and part-time developer roles where speed, ownership, and clear communication matter.

What I Can Help With

- Python automation, PDF/DOCX report generation, React dashboards and internal tools, data cleanup and structured summaries, and AI-assisted prototyping with documentation and testing.

Best Proof

Rental Research Report Generator | Python, ReportLab, python-docx, JSON

- Built a Python tool that normalizes rental listing data, filters noisy results, ranks suitable houses, and generates decision reports in English and Tamil.
- Replaced scattered rental searching with a structured shortlist, budget and commute logic, PDF/DOCX/Markdown outputs, and real-world verification safeguards.
- Added offline sample data and unit tests so the project can be shown reliably without live portals.

Printing Press ERP / Business Management System | React, Supabase, business workflows

- Built and deployed practical React/Supabase business software for workflow tracking and operational dashboards.

Skills

Python, JavaScript, React, Vite, Supabase, Django basics, HTML, CSS, C, data analysis, data structures, TypeScript basics, REST APIs, PostgreSQL, Git, GitHub, GitHub Actions, cloud fundamentals, Docker basics, Codex, ChatGPT, AI-assisted development, prompt engineering, ERP development, dashboard development, business software, automation, PDF/DOCX generation, responsive web design, UI/UX design, basic testing, CI/CD basics, CLI tools, technical documentation, GSAP basics, Framer Motion basics

Learning Evidence

- Completed 23 course credentials across machine learning, generative AI, cloud fundamentals, cybersecurity, programming, data analysis, and front-end development. Certificate archive available from the portfolio.

Education

- B.Sc. Computer Science with Artificial Intelligence, Rathinam Global University, Coimbatore - 2028
