DEEPAN K

has successfully completed the online Specialization

Machine Learning

Congratulations on completing all three courses of the Machine Learning Specialization! You studied modern machine learning concepts, including supervised learning (linear regression, logistic regression, neural networks, decision trees), unsupervised learning (clustering, anomaly detection), recommender systems, and reinforcement learning. You learned some of the best practices for building machine learning models. You've also gained practical skills to apply machine learning techniques to challenging real-world problems. Now #BreakIntoAI and start building your career in machine learning!

DEEPAN K

has successfully completed the online Specialization

Decentralized Finance (DeFi): The Future of Finance

In this specialization, learners developed the essential skills for understanding Decentralized Finance or DeFi. This includes an analysis of DeFi infrastructure and the problems that DeFi seeks to solve. The learners also mastered the key primitives in this space such as blockchain mechanics, supply and ownership, and loans and swaps. The learners also explored the leading DeFi protocols including MakerDAO, Compound, Aave, Uniswap and dYdX. Finally, with any new technology there are risks. Learners analyzed smart contract risk, governance risk, scaling as well as regulatory issues.
